Jordanian Collegiate Programing contest JCPC,
Amman 25/Nov/ 2024 Programing contest, problem solving
12enth.

Three-month Internship at Tulips Technology
16/April/2026 – 16/July/2026.

PROJECTS

- **Risk Management System for the University of Jordan (.NET-Core/React):** Designed and implemented a full-cycle enterprise web application using ASP.NET Core and Entity Framework Core, featuring a multi-stage workflow with automated status transitions and robust role-based access control (RBAC).
 - Engineered a dynamic assessment engine that calculates real-time risk scores and generates interactive heat-map visualizations for proactive and reactive risk profiling.
 - Integrated a comprehensive audit trail and evidence-reporting module to ensure administrative compliance, secure data persistence, and system traceability.
- **E-Government Issue Reporting Mobile App**
 - Developed a cross-platform mobile application using Flutter enabling citizens to seamlessly report local infrastructure and civic issues to government agencies.
 - Integrated Firebase for secure user authentication and scalable cloud storage for multimedia issue evidence.
 - Implemented real-time backend synchronization to facilitate live issue tracking, status updates, and agency feedback loops.
- **University Form Submission & Review Platform**
 - Collaborated with an Agile team to build a lightweight, web-based platform streamlining university student administrative workflows and form management.
 - Developed the frontend using Vanilla HTML5, CSS3, and JavaScript, ensuring structured input validation and an intuitive user interface.
 - Implemented reviewer feedback workflows and status tracking to optimize communication between students and university administration.

EDUCATION

- **University of Jordan**
Bachler in CIS (Computer Information Systems)

2022 – 2026
